D1. Description of the problem

1.A WHAT IS THE PROBLEM ? USE 5W+2H TO DESCRIBE WHAT IS THE CURRENT SITUATION.

Problem description: **Intermittent Hall function - unwelded fork**

Part Number & Description: Brush mounting plate assy (503-773-99-99)

Traceability of nok parts: **DMC 5037732418651051, ASN 180397098**

Recurrence: **Recurrent defect**

Defect S/R: **No**

nok part picture / sketch:

Other files::

What happened?: **Intermittent Hall function - unwelded fork**

Why is it a problem?: **Intermittent Hall function - unwelded fork**
No Hall sensor signal.

When did it happen? : **10/3/2024** 11:00:00 PM (your local time)

Who detected it?: **Customer - Adient Jimbolia**

Where was it detected? : **Adient Jimbolia production**

How was it detected?: **During production**

How many parts ?: **1.00**

ok part picture / sketch:

D 4. Root cause of occurrence

Work out the root causes using first Ishikawa, then FTA and finally 5 why's (Tools to use chosen by Nidec).

ROOT CAUSE OF OCCURRENCE

1-Pressure controller not locked and setter can change the program manually
2-No sensor implemented to launch new cycle in the machine

HOW WAS THE DEFECT REPRODUCED ?

Parts were welded with pressure (=2 Bar) lower than the minimum (= 2,5 Bar)
Parts were welding not proply due to there is not enough pressure during the welding operation to melt the fork

Attachment:

D 5. Root casue of non detection

ROOT CAUSE OF NON DETECTION :

insuffisant standard :

in the current standart there is no indication to doubel check the presure after maintenance intervention by the quality agent on the station of Hall IC -fork

Attachments:

D 6. Countermeasure to non detection and occurrence

6.A ACTIONS FOR OCCURENCE

Action	Responsible	Date Plan	Date Clos.	Attachments Please click 'Save' to activate attachment field
Automatisation of the pressure controller	Hafedh	12/2/2024	12/20/2024

LLC Type

Date of LLC: **12/5/2024**

Logistics: ☐ Management: ☐

Product: ☐ Detection: ☐

Occurence: ☑ Process: ☐

1. What was the problem?

What happened?

Intermittent Hall function - unwelded fork

Who detected it?

Customer - Adient Jimbolia

Where was it detected?

Adient Jimbolia production

How was it detected?

During production

Why is it a problem?

Intermittent Hall function - unwelded fork
No Hall sensor signal.

When did it happen?

10/3/2024 11:00:00 PM (your local time)

How many parts ?

1.00

2. What is the cause?

Not activate of pressure control after maintenance intervention
Manual setting of pressure controller (Not locked)

3. Description of the applied modification

BEFORE

Manual pressure controller: unlocked system

AFTER

Automatic pressure controller : Locked system by IHM

4. What we learned?

ERADICATION

What is the countermeasure that was put in place to avoid recurrence ?

CHECKING

SIGNALING

Automatic pressure controller: Locked system in the machine	What is the method (who, what, how) for the countermeasures? **SOP check list**	What is the countermeasure supposed to do or make c a non conformity ? **Audit workstation**

5. What has been modified?

a. Proces is modified according to Before/ After sheet:	☑	g. Visual aids are posted:	☐
b. All documents have been updated and has been validated with the operators:	☐	h. Operators and other functions are trained:	☑
c. Procedures and work instructions:	☑	i. Proof of training is avalaible (records,5 ' meeting):	☑
d. Control Plan and PFMEA:	☑	j. Operators can correctly describe what they must do:	☑
e. Maintenance instructions:	☑	k. Other:	☐
f. Records (start-up checklists, reaction sheets, preventive maintenance...):	☑		
An evidance of modification:			

6. Potential applicability

LLC Applicability Product: **All CM4 Products**

LLC Applicability Line / process: **CM4**

LLC Applicability Plant: **SCEET TUNISIA**

8D Report Explanation

D1
Nidec opens and incident and issues an 8D to the Supplier
D2-D3
The Supplier undertakes to: • **Contain all defective Supplies which have the same defect from all stocks (finished and semi-finished) and in transportation and at all affected Nidec locations worldwide,** • **Upon request, send a team to carry out sorting and inspection operations at Nidec and Nidec's Customers locations,** • **Upon request, send a team at Nidec's site to address the issue, even if the responsibility of the Supplier has not been proven yet,** • **Replace defective batch (es),** • **Label non-defective batch(es) accordingly,**
D4-D5-D6
The Supplier undertakes to: • **Perform an exhaustive analysis to identify the root cause of the non-conformity with the defined methods,** • **Provide Nidec with an action plan to be validated by Nidec prior to any action being implemented.** • **Update the production CP accordingly to be validated by Nidec.**
D7-D8
The Supplier undertakes to: • **Check the efficiency of the actions implemented. Results have to be validated by Nidec.** • **Update all related documents.** • **Implement the actions to similar Supplies and processes (elimination of recurrences).** • **Issue a Lesson Learned Card.**
Supplier 8D Report Evaluation Sheet
8D Evaluation Sheet has to be presented with final version of 8D report. Evaluation sheet is a tool for assessing compliance of 8D content with Nidec requirements. There are with three levels of acceptance: • **0% - 79% - 8D does not meet minimum requirements and cannot be accepted** • **80% - 89% - 8D meets minimum requirements and can be accepted** • **90% - 100% - 8D evaluated with bonus points and can be accepted** **8D Evaluation Sheet has three levels of points:** • **Unsatisfactory/Not OK** • **Acceptable** • **Requirements fulfilled/Bonus**
Incidents closure
8D following C1 and C2 incidents will be closed after Nidec validation.

Nidec may perform an 8D audit to assess 8D application for C1 incidents. The standard template (Supplier 8D audit) to be used is provided with the RFQ package.
