LESSON LEARNED CARD

Site: Assyme monterrey	**Type:**	**Detection**	**CIN:** 18799
Production Line: BR	**Department:**	**Quality**	**SIN:** 18799
Product: Scania	**LLC Author:**	Daniel Morales	**Date:** 23/08/2024

WHAT WAS THE PROBLEM? (5W + 2H)

What happened?
Innoperative motor in noise room

Why is it a problem?
Innoperative motor in noise room

When did it happen?
August 6, 2024

Who detected it?
Operator of noise room

Where was detected?
Production Line:

How was detected?
Was applied a electrical current and motor was turn off

How many?
2

WHAT IS THE SYMPTOM?

WHAT IS THE ROOT CAUSE?

RELEVANT FACTOR

The part with an unwelded ground clip to circuit breaker detected on inspection final was not collocated in the red container

Why? The part is separated and sent to be welded in the welding station

Why? The final inspector not considered the part as non conformance part and not was deposited it in the red container

Why? the final inspector was not following the non conforming material procedure

Why? Final inspector does not knows the non conforming material procedure

Why? The non conforming material procedure was not deployed in the final inspections as visual aid or work instructions

BEFORE

non conforming material is place in trays without protection of bad handling

AFTER

Implement red jails with lock to place non conforming material

WHAT WE LEARNED?

ITEM (Control Factor)		METHOD (Control Point)	STANDARD
Handling of non conforming material	What?	Non conforming material	**What is Conform?** The non conforming material due place in red jails with lock
	Where?	Production line	
	When?	During the production	
	Who?	Quality / Production	**What is Non-Conform?** The non conforming material is place in trays without protection
	How?	The non conforming material due place in red jails with lock	
	How Many?	All non conforming parts	

POTENTIAL APPLICABILITY

To whom?	Production Line:	ALL		When?	23/08/2024
	Operation # :	ALL		When?	23/08/2024
Did you share the LLC with antoher Plant / Division?		Yes	To whom?	When?	21-nov

WHAT HAS BEEN MODIFIED?

1.- PROCESS	2.- DOCUMENTATION				3.- VISUAL AID	4.- OPERATORS				
1.- Process is modified according to Before/ After sheet	2.- All documents have been updated and validated with the operators…	2.1.- Proces is modified according to Before/ After sheet	2.2.- Maintenance instructions	2.3.- Records (start-up checklists,reaction sheets,preventive maintenance…)	3.- Visual aids are posted? Are they in a visible spot?	4.- Operators are trained…	4.1.- Proof of training is avalaible.	4.2.- Operators can correctly describe what they must do…	4.2.1.- Manufacturing process steps.	4.2.2.- Maintenance steps.
